

Raising Safety levels in the Future
拉朵安健为打造最高行业安全标准
新出台的产品检测规范

- When receiving refined walnut oil: batch analysis

生产流程开始前，收到精炼核桃油原料后进行批次抽样检验

- If the batch is in line with the Chinese DEHP regulation, this lot will be eligible for China without being validated yet

如该批次原料 DEHP 检测结果符合中国规定，该批次可用于后续生产出口到中国的产品中。

- If the batch is higher than this level, this lot will be rejected for China

如该批次 DEHP 检验结果超出中国规定，该批次将不可用作任何销往中国市场的产品原料油。

- When the final oil is made: Analysis of the oil

生产流程结束后的产品检验

- If the oil is less than or equal to the Nx level (the value defined for DEHP here is below 1mg/kg), this oil will still be eligible for China

如该产品检验结果低于或等于 Nx 值（针对 DEHP 的 Nx 标准值为低于 1mg/kg），产品符合销往中国的标准

- If the oil is higher than this level, this oil will be rejected for China

如果该产品检验结果高于 Nx 值，产品不得销往中国

- A sample of the eligible oil will then be sent to China for analysis

合格产品将抽样送往中国进行二次检验

- If the result of the China DEHP analysis is less than or equal to 1.5 mg/kg, the oil will be accepted for China

如在中国的 DEHP 检验结果低于或等于 1.5mg/kg，产品符合在中国销售的标准

- If the result of the China analysis is greater than 1.5mg/kg, the oil will be rejected for China

如果在中国的检验结果高于 1.5mg/kg，产品不得销往中国

- The mixture can then be put in a can to China

最终通过所有检验标准的产品方可罐装销往中国。
